Grade 7: Math

3.1 Geometry: Introduction

- Some common words we use in geometry.
1. **Polyhedron:** A solid with faces which are polygons.
 2. **Prism:** A solid with two congruent bases and named after those bases. Its other faces are rectangles.
 3. **Pyramid:** A solid with one base and named after that base. The other faces are triangles.
 4. **Regular Polyhedron:** A solid with all faces congruent.
 5. **Cube:** A regular rectangular prism.
 6. **Tetrahedron:** A regular triangular pyramid.
- **Sketching 3-D using a Dot Grid**

- **Homework:** Textbook page 79 #1-4, 6-9.
